

Flavored Coffees

We offer the best flavored coffees in the world. All of our flavored coffees are 100% Arabica with premium quality, non-allergenic flavorings. Yes, even the people with allergies, such as allergic to chocolate, can drink our flavored coffees. However, be careful when ordering our nut coffees, some of them, especially our premiums have nut slivers in the coffee.

Our flavored coffees are based on 100% Arabica blends with 3% flavoring by weight. We also offer premium flavored coffees based on our Roaster Select blend with 6% flavoring by weight or with almond slivers, etc. Seriously, you will not find a bettered flavored coffee. Some people frown upon the use or sale of flavored coffees as a detour from true gourmet coffee, but truth be known, people have flavored coffees with chocolate, cinnamon, etc. since the discovery of coffee. For example, it is said that Voltaire consumed forty to fifty cups of his favorite coffee, a mixture of chocolate and coffee, everyday. Did you know that about 50% of coffee sold in American coffeehouses is flavored? Try some today.
